

Island number sense

12 min: questions 1-8 | 5 min: questions 9-10 | 3 min: check and reflect

Name: _____ Date: _____

01 MULTIPLICATION

$248 \times 36 = \underline{\quad}$

02 DIVISION

864 divided by 24 = $\underline{\quad}$ (include any remainder)

03 DECIMALS

$4.75 + 2.6 = \underline{\quad}$

04 DECIMALS

$8.4 - 3.75 = \underline{\quad}$

05 DECIMALS

Round 6.847 to the nearest hundredth.

06 FRACTION OPERATIONS

$1/2 + 1/3 = \underline{\quad}$

07 FRACTION OPERATIONS

$3/4 \times 2/3 = \underline{\quad}$

08 VOLUME

Find the volume of a box 5 cm long, 4 cm wide and 3 cm high.

09 MONEY

Nini buys 3 notebooks at \$2.45 each. She pays \$10. What is her change?

10 FRACTION OPERATIONS

Kai says $1/2 + 1/3 = 2/5$. Explain why that is wrong.

First try: $\underline{\quad}$ / 10 Circle a tricky question. Copy its skill name:

My practice skill: _____

Day 1: check and learn

Island number sense

01 / Multiplication

8,928

$248 \times 36 = 8,928$. Use partial products or an area model.

02 / Division

36

$24 \times 36 = 864$. The remainder is zero.

03 / Decimals

7.35

Align equal place values: $4.75 + 2.6 = 7.35$.

04 / Decimals

4.65

Align equal place values: $8.4 - 3.75 = 4.65$.

05 / Decimals

6.85

The thousandths digit is 7, so round the hundredths up.

06 / Fraction operations

$\frac{5}{6}$

$\frac{1}{2} = \frac{3}{6}$ and $\frac{1}{3} = \frac{2}{6}$. Add to get $\frac{5}{6}$.

07 / Fraction operations

$\frac{1}{2}$

Multiply: $\frac{6}{12}$. Simplify to $\frac{1}{2}$.

08 / Volume

60 cubic cm

$5 \times 4 \times 3 = 60$ cubic cm.

09 / Money

\$2.65

$3 \times 2.45 = 7.35$; $10.00 - 7.35 = 2.65$.

10 / Fraction operations

The correct sum is $\frac{5}{6}$.

Use equal-sized parts: $\frac{3}{6} + \frac{2}{6} = \frac{5}{6}$. Also, adding a positive amount to $\frac{1}{2}$ cannot give $\frac{2}{5}$, which is smaller than $\frac{1}{2}$.

Match the skill label to the practice guide at the end of this PDF.

Find your next practice step

Circle a tricky question. Match its skill label below. Ask an adult to help you choose.

Find games at LearnWithNini.com. Game names work from paper; no clicking needed. "Related basics" means the game reviews a foundation, not the exact advanced problem.

MULTIPLICATION

Multiplication Sprint - related basics

Power Facts and Break Apart build fact fluency. Multi-digit written multiplication needs paper practice.

DECIMALS

Practice on paper

No dedicated decimal game yet. Use a place-value chart, tenths/hundredths grids and the worked answer key.

VOLUME

Practice on paper

Sketch equal layers of unit cubes. Multiply length x width x height. Label your answer in cubic units.

CONVERSIONS

Practice on paper

Write the unit relationship given in the question. Draw or calculate the equivalent amount in the new unit.

COORDINATES

Practice on paper

Draw and label x- and y-axes. Move horizontally first, then vertically. Label the point (x, y).

DIVISION

Division Dash - related basics

Practice facts and remainders. Two-digit divisors and longer written calculations need paper review.

FRACTION OPERATIONS

Fraction Builder - related basics

Reviews visual fractions and equivalence. It does not teach fraction arithmetic; work through the key on paper.

MONEY

Money Match

Choose Grade 2 Money Problems or Change Challenge. Decimal multiplication needs paper review.

ORDER OF OPERATIONS

Practice on paper

Do parentheses first, then multiplication/division, then addition/subtraction. Work left to right within each level.

SHAPES

Geometry Builder - Shape Builder

Practice sides and shape names. For shape categories, compare their properties together on paper.

Offline is enough: redo one missed problem and explain your method.
