

Island number sense

12 min: questions 1-8 | 5 min: questions 9-10 | 3 min: check and reflect

Name: _____ Date: _____

01 ADD & SUBTRACT

$2,468 + 1,757 = \underline{\quad}$

02 ADD & SUBTRACT

$5,000 - 2,684 = \underline{\quad}$

03 MULTIPLICATION

$36 \times 7 = \underline{\quad}$

04 DIVISION

156 divided by 6 = $\underline{\quad}$ (include any remainder)

05 PLACE VALUE

What is the value of the 6 in 46,218?

06 ROUNDING

Round 38,652 to the nearest thousand.

07 FRACTION OPERATIONS

$3/8 + 2/8 = \underline{\quad}$

08 DECIMALS

Write $7/10$ as a decimal.

09 WORD PROBLEMS

Nini packs 6 boxes with 24 pencils each. She gives away 35 pencils. How many remain?

10 FRACTION OPERATIONS

Kai says $3/8 + 2/8 = 5/16$. Explain his mistake.

First try: $\underline{\quad}$ / 10 Circle a tricky question. Copy its skill name:

My practice skill: _____

Day 1: check and learn

Island number sense

01 / Add & subtract

4,225

Add by place value. Check: $4,225 - 1,757 = 2,468$.

02 / Add & subtract

2,316

Check with addition: $2,316 + 2,684 = 5,000$.

03 / Multiplication

252

$36 \times 7 = 252$. Use partial products or an area model.

04 / Division

26

$6 \times 26 = 156$. The remainder is zero.

05 / Place value

6,000

The 6 is in the thousands place.

06 / Rounding

39,000

The hundreds digit is 6, so round up.

07 / Fraction operations

$\frac{5}{8}$

Combine 3 eighths and 2 eighths. The parts stay eighths.

08 / Decimals

0.7

Seven tenths is 0.7.

09 / Word problems

109 pencils

$6 \times 24 = 144$; $144 - 35 = 109$.

10 / Fraction operations

The answer is $\frac{5}{8}$.

The pieces are still eighths. Add the numerators, not the denominators.

Match the skill label to the practice guide at the end of this PDF.

Find your next practice step

Circle a tricky question. Match its skill label below. Ask an adult to help you choose.

Find games at LearnWithNini.com. Game names work from paper; no clicking needed. "Related basics" means the game reviews a foundation, not the exact advanced problem.

ADD & SUBTRACT

Practice on paper

Redo the calculation by place value. Check subtraction with addition. Use a number line or place-value chart if needed.

DIVISION

Division Dash - related basics

Practice facts and remainders. Two-digit divisors and longer written calculations need paper review.

ROUNDING

Place Value Challenge

Choose Rounding Challenge: nearest 10, 100 or 1,000. For larger places, mark neighboring values on paper.

DECIMALS

Fraction & Decimal Lab

Choose Fractions & Decimals for tenths, hundredths and comparisons. Decimal arithmetic and thousandths need paper practice.

COMPARE NUMBERS

Number Battle - related basics

Greater Number Battle compares numbers up to 9,999. For larger numbers, compare digits by place on paper.

MULTIPLICATION

Multiplication Sprint - related basics

Power Facts and Break Apart build fact fluency. Multi-digit written multiplication needs paper practice.

PLACE VALUE

Place Value Challenge

Choose Digit Detective or Build the Number. For higher places beyond the game, use a paper place-value chart.

FRACTION OPERATIONS

Fraction & Decimal Lab

Choose Fraction Operations: like denominators or multiply by a whole number. Practice mixed-number calculations on paper.

WORD PROBLEMS

Math Detective - related practice

Choose Solve the Clue or Two-Step Mysteries. These build story reasoning; use paper for larger-number calculations.

Offline is enough: redo one missed problem and explain your method.

Find your next practice step

Circle a tricky question. Match its skill label below. Ask an adult to help you choose.

Find games at LearnWithNini.com. Game names work from paper; no clicking needed. "Related basics" means the game reviews a foundation, not the exact advanced problem.

FACTORS & PRIMES

Practice on paper

List factor pairs. A prime number has exactly two positive factors: 1 and itself.

AREA & PERIMETER

Geometry Builder

Choose Area Builder or Perimeter Builder for whole-number rectangles. Show your calculation on paper first.

ELAPSED TIME

Time Match - Elapsed Time

Find start, end or elapsed time. For longer intervals, also draw jumps on a paper timeline.

NUMBER PATTERNS

Practice on paper

Write the rule, then add two terms. Use counters or a number line to check each jump.

FRACTIONS

Fraction & Decimal Lab

Choose Build It, Equivalent Fractions or Compare Fractions. Use equal-part models to explain your answer.

CONVERSIONS

Practice on paper

Write the unit relationship given in the question. Draw or calculate the equivalent amount in the new unit.

ANGLES & SYMMETRY

Practice on paper

Use a square corner to check a right angle. Fold a paper shape to test lines of symmetry.

SHAPES

Geometry Builder - Shape Builder

Practice sides and shape names. For shape categories, compare their properties together on paper.

Offline is enough: redo one missed problem and explain your method.
